Notes Category:Windows 8 Category:Windows installation softwareQ: Can't view form input after changing type I'm making a form in jQuery and am changing the type of form elements from type="text" to type="number", but the submit button loses its text and doesn't let the user submit. It remains a submit button, even though a number was entered. I have only a desktop browser on my computer, but I suspect there may be some kind of security reason I need to know. How can I fix this problem? function validateNumber() { var min = 1; var max = 100; var age = Math.round(document.getElementById f678ea9f9e
